*"Good wine is a necessity of life for me"*

THOMAS JEFFERSON

"The Culture of Wine" - exhibition is a unique and innovative approach to exploring and understanding the history, growing and production of wine. The exhibit takes each participant through various elements of historical value and explores the process and art of wine production from vineyards to cellar. This is accomplished by combining traditional wine related artifacts, winemaking tools, equipment & vineyard reproductions with visually stunning photo murals and lcd multimedia panels.

The modular design allows the exhibit to adapt to various spaces.
